Motofog MF40SD

Portable and Powerful Dust Suppression

The latest Motofog MF40SD dust suppression unit is a compact, portable and powerful unit for larger demolition sites. It comes fitted with a tried and tested Yanmar engine and only needs connection to a water supply to throw water 35 metres!

The new upgrade includes a retractable mast with 270° oscillation and remote control. It also has new fork lift trays for ease of movement around site and in and out of vans or storage.

The MF40SD can work from a 1" water supply and for its size and weight (205kg) it is the most effective dust control unit on the UK market!

For the coverage, it is half the price of competitors units, offering great value for money!
